

Communicating with Fill Sight

RemoteXY App Setup Guide

For Fill Sight Communication | Revision 1.0

Overview

Fill Sight communicates wirelessly with your phone or tablet using the RemoteXY app. RemoteXY is a third-party application available on both the Google Play Store and Apple App Store. It provides a reliable Bluetooth connection between your device and the Fill Sight control box.

Before you can view tank volume, adjust settings, or calibrate your Fill Sight unit, you must download RemoteXY and activate a Pro license.

Recommended License Option

RemoteXY offers two licensing options inside the app:

- **Monthly Subscription** — Recurring charge; can be canceled anytime.
- **One-Time “Buy Forever” Purchase** — Lifetime access with a single payment.

We strongly recommend the one-time “Buy Forever” purchase.

This option protects you from future price increases and provides permanent access without ongoing subscriptions. The license is tied to your app store account (Google or Apple) and can be installed on multiple devices signed into the same account.

TIP: Multiple Devices

If you have multiple employees or want to use Fill Sight from both a sprayer cab tablet and a tender trailer tablet, purchase the one-time license on a shared account. All devices signed into that account can use the full Pro features.

Step-by-Step Setup

1. Download RemoteXY

1. Open the Google Play Store (Android) or Apple App Store (iOS) on your device.
2. Search for “RemoteXY” or scan the QR code provided below.
3. Install the official RemoteXY app (the icon looks like the one shown to the left).

2. Purchase the Pro License

1. Open the RemoteXY app.
2. Navigate to the License or Pro section (usually accessible from the main menu or settings).
3. Select “Activate PRO” or the equivalent option.
4. Choose the **one-time “Buy Forever”** purchase option (recommended).
5. Complete the purchase through your app store account.

Note: The Pro license unlocks full functionality, including unlimited interface elements and full control of connected devices like Fill Sight.

3. Account & Device Considerations

The purchased Pro license is linked to:

- The app store where you installed RemoteXY (Google Play or Apple App Store)
- The account you are signed into on that store

This is typically the same account used on your phone or tablet. You can install RemoteXY with the full Pro license on any device signed into the same account — ideal for teams or multiple tablets.

Next Steps: Connecting to Fill Sight

Once RemoteXY is installed and the Pro license is active:

- Power on your Fill Sight control box (green light should illuminate).
- Open RemoteXY and add a new device via Bluetooth.
- Select “Fill Sight” from the list of available devices.
- You should now see the Main Display with tank volume, tilt, and sensor readings.

For complete connection steps, control box orientation, status lights, and troubleshooting, please refer to the Fill Sight Operations Manual (sections: Communicating With Fill Sight, Operation, and Troubleshooting Guide).

IMPORTANT NOTES

- Only one device can be connected to a Fill Sight unit at a time. The blue light on the control box indicates an active connection.
- If “Fill Sight” does not appear in the Bluetooth list, ensure the control box is powered on, Bluetooth is enabled on your device, and no other device is currently connected.
- This document is an addendum to the Fill Sight Operations Manual. Always consult the full manual for detailed installation, calibration, and troubleshooting information.
